

Magnetic Base

- **Rare Earth Magnets Help Hold Position of Components During Initial Setup**
- **On/Off Switchable Options Available**

The Magnetic bases provide free positioning and instant clampdown of optical components for all laboratories with ferromagnetic work surfaces such as Mahfanavar breadboards. They are ideal for reducing time for experimental set up with On/Off switchable versions with strong holding forces. You can order different top plates according to different applications.

Swivable Base Adapter

- **360° Swiveling Base Fastens to Existing $\varnothing 1/2$ " Post Holders via a M6 Cap Screw**
- **Magnets in Base Hold Position of Components on Breadboard During Initial Setup**
- **ideal for applications that require a large number of components to be packed into a small space**

Part Number	Description	Material
MAG200	Magnetic Base	Black anodized aluminum
PHAA	Swivel Base Adapter	Black anodized aluminum
